

Number – addition and subtraction

perform mental calculations, including with mixed operations and large numbers (and decimals)

Partition both numbers into hundreds, tens, ones and decimal fractions and recombine

$$\begin{aligned} 35.8 + 7.3 &= 30 + 5 + 0.8 + 7 + 0.3 \\ &= 30 + 12 + 1.1 \\ &= 42 + 1.1 \\ &= 43.1 \end{aligned}$$

Partition second number only into hundreds, tens, ones and decimal fractions and recombine

$$\begin{aligned} 35.8 + 7.3 &= 35.8 + 7 + 0.3 \\ &= 42.8 + 0.3 \\ &= 43.1 \end{aligned}$$

Add the nearest whole number then adjust

$$\begin{aligned} 52 + 11.9 &= 52 + 12 - 0.1 \\ &= 64 - 0.1 \\ &= 63.9 \end{aligned}$$

practise addition for larger numbers, using the formal written methods of columnar addition (see Appendix 1)

Extend the use of compact column method to adding several numbers with mixed decimals.

$$\begin{array}{r} 23.361 \\ 9.080 \\ + 59.770 \\ 1.300 \\ \hline 212 \\ \hline 93.511 \end{array}$$

Children should be reminded of the importance of aligning the columns accurately.

Where there is an 'empty' space in a decimal column, pupils could insert a zero to show the value.

perform mental calculations, including with mixed operations and large numbers (and decimals)

Use known number facts and place value to subtract

$$6.1 - 2.4 = 3.7$$

Subtract the nearest whole number then adjust

$$\begin{aligned} 52 - 11.9 &= 52 - 12 + 0.1 \\ &= 40 + 0.1 \\ &= 40.1 \end{aligned}$$

practise subtraction for larger numbers, using the formal written methods of columnar subtraction (see Appendix 1)

Column Subtraction with decomposition

$$\begin{array}{r} 641 \\ \times 34 \\ \hline 2564 \\ 2168 \\ \hline 468 \end{array}$$

$$\begin{array}{r} 8.36 \\ - 1.17 \\ \hline 7.19 \end{array}$$

Including decimals

Revision of formal compact column method extending to more complex integers and applying to problem solving using money and measures, including decimals with different numbers of decimal places. Align the decimal point when setting out calculations.

Use 'place holders' to aid understanding of the value in that column.

$$\begin{array}{r} 10'5 \cdot 34'19 \text{ kg} \\ - 36 \cdot 080 \text{ kg} \\ \hline 69 \cdot 339 \text{ kg} \end{array}$$

Number – multiplication and division

perform mental calculations, including with mixed operations and large numbers (and decimals)

Partitioning

$$\begin{aligned} 4.7 \times 6 &= (4 \times 6) + (0.7 \times 6) \\ &= (24) + (4.2) \\ &= 28.2 \end{aligned}$$

perform mental calculations, including with mixed operations and large numbers (and decimals)

Partitioning

$$\begin{aligned} 7.2 \div 3 &= (6 \div 3) = (1.2 \div 3) \\ &= 2 + 0.4 \\ &= 2.4 \end{aligned}$$

identify common factors, common multiples and prime numbers

Use a variety of resources (including a calculator) to investigate common factors, common multiples and prime numbers. Make models and images to display facts. Investigate the patterns within the numbers.

multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of short and long multiplication (Appendix 1)

Short multiplication and Long multiplication as in Year 5, but apply to numbers with decimals.

$$\begin{array}{r} 3.19 \\ \times 8 \\ \hline 17 \\ \hline 25.52 \end{array}$$

Pupils may need reminding that single digits belong in the ones (units) column.

A sound understanding of place value and the

formal method itself are required before progressing to decimal multiplication.

divide numbers up to 4 digits by a two-digit whole number using the formal written method of short and long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context (Appendix 1)

Short division

Short division

98 ÷ 7 becomes

$$\begin{array}{r} 14 \\ 7 \overline{) 98} \\ \underline{7} \\ 28 \\ \underline{28} \\ 0 \end{array}$$

Answer: 14

432 ÷ 5 becomes

$$\begin{array}{r} 86 \text{ r} 2 \\ 5 \overline{) 432} \\ \underline{40} \\ 32 \\ \underline{30} \\ 20 \\ \underline{20} \\ 0 \end{array}$$

Answer: 86 remainder 2

496 ÷ 11 becomes

$$\begin{array}{r} 45 \text{ r} 1 \\ 11 \overline{) 496} \\ \underline{44} \\ 56 \\ \underline{55} \\ 10 \\ \underline{11} \\ 0 \end{array}$$

Answer: 45 $\frac{1}{11}$

Long division (for dividing by 2 digits)

Long division

432 ÷ 15 becomes

$$\begin{array}{r} 28 \text{ r} 12 \\ 15 \overline{) 432} \\ \underline{30} \\ 132 \\ \underline{120} \\ 120 \\ \underline{120} \\ 0 \end{array}$$

Answer: 28 remainder 12

432 ÷ 15 becomes

$$\begin{array}{r} 28 \\ 15 \overline{) 432} \\ \underline{30} \\ 132 \\ \underline{120} \\ 120 \\ \underline{120} \\ 0 \end{array}$$

Answer: 28 $\frac{4}{5}$

432 ÷ 15 becomes

$$\begin{array}{r} 28 \cdot 8 \\ 15 \overline{) 432 \cdot 0} \\ \underline{30} \\ 132 \\ \underline{120} \\ 120 \\ \underline{120} \\ 0 \end{array}$$

Answer: 28.8

Remainders

Quotients expressed as fractions or decimal fractions

$$61 \div 4 = 15 \frac{1}{4} \text{ or } 15.25$$

Number – addition and subtraction

Number – multiplication and division

solve addition multi-step problems in contexts, deciding which operations and methods to use and why

Use all the models and images mentioned above.
Discuss which is most effective and why.

Singapore Bar Method

round answers to a specified degree of accuracy, e.g. to the nearest 10, 20, 50 etc., but not to a specified number of significant figures

Use knowledge of rounding (see fraction Policy) to create estimates.

use their knowledge of the order of operations to carry out calculations involving the four operations
explore the order of operations using brackets; for example, $2 + 1 \times 3 = 5$ and $(2 + 1) \times 3 = 9$

Review and investigate the effect of carrying out operations in different orders. Explore the effect. Introduce and use BODMAS to solve calculations.

use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy

Estimate answers before solving any calculation.
Check against estimate after calculating (and use inverse check).

use a variety of language to describe subtraction

+ add, addition, more, plus, increase, sum, total, altogether, score, double, near double, how many more to make...? tens boundary, hundreds boundary, units boundary, tenths boundary, inverse

= equals, sign, is the same as

solve subtraction multi-step problems in contexts, deciding which operations and methods to use and why
